**250**

**MSSPs<sup>TM</sup>**

**2021 Edition**

**Welcome to the Top 250 MSSPs™ 2021 Edition.** The research and rankings leverage MSSP Alert's fifth annual worldwide survey of MSSPs (conducted April through August 2021) along with MSSP Alert's editorial coverage.

The resulting rankings are based on:

- Annual recurring revenues
- Profitability
- Business growth rate
- Cyber professional headcount
- Managed security services offered
- MSSP Alert's editorial coverage of MSSPs worldwide
- Third-party industry honors (i.e., Gartner, Forrester, IDC, etc.)

The MSSP market continues to accelerate and grow amid multiple market drivers, including but not limited to:

- The continued cyber talent shortage facing companies and organizations of all sizes.
- For-profit supply chain attacks & ransomware events that target businesses and their ecosystem partners.
- Work-from-anywhere, work-from-home and remote access business models that accelerated amid the coronavirus pandemic.
- Heightened nation-state attacks allegedly launched from China, Russia, North Korea and other locales.
- President Biden's executive order on cybersecurity, issued in May 2021 -- which commanded U.S. federal government contractors and IT service providers to further harden their systems.

Multiple cybersecurity market segments are evolving and converging to address these new MSSP realities. Examples include:

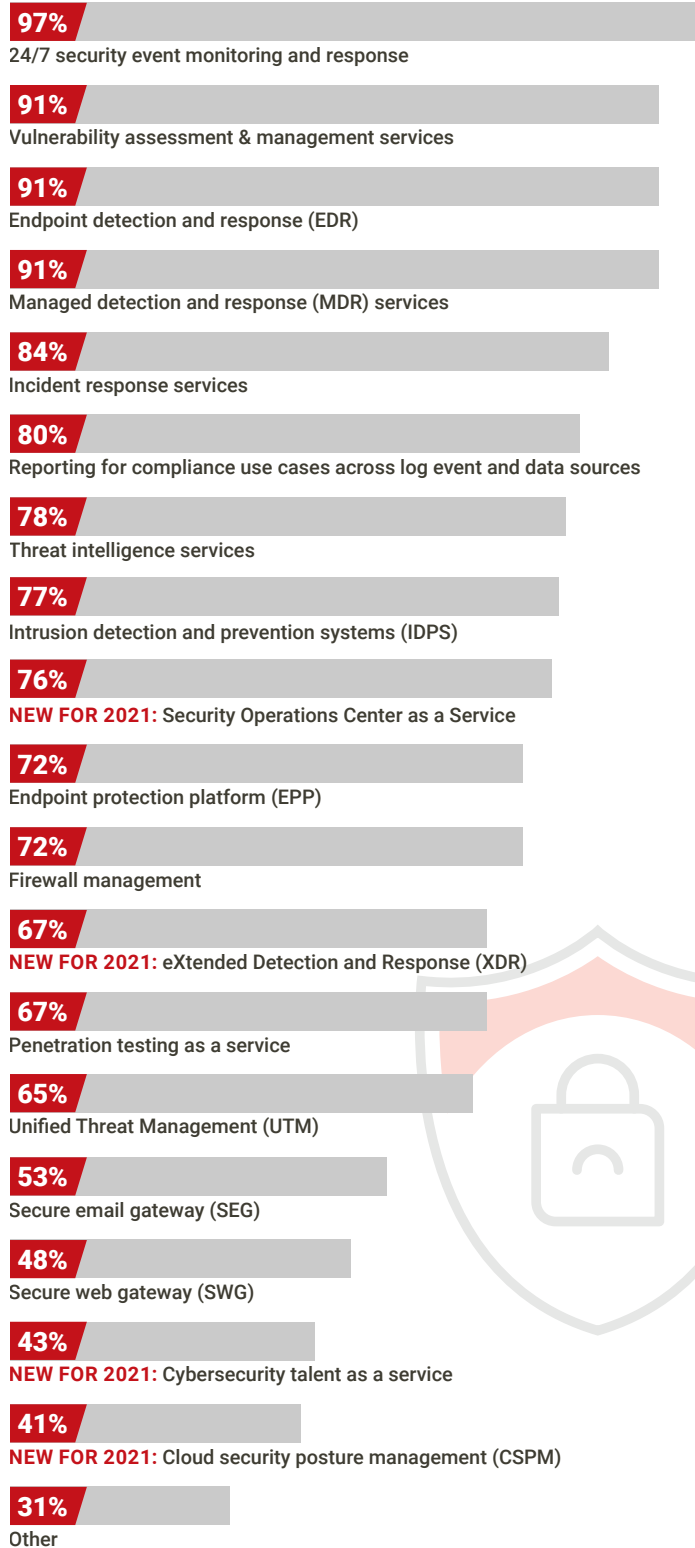

- **MSSP and MSP Partnerships:** Small MSPs generally provide basic endpoint and data protection services, but they increasingly lean on full-blown, pure-play MSSPs to deliver threat detection, response, SOC and other advanced services.
- **M&A:** Twenty-two major MSSP mergers and acquisitions occurred from January 2021 through August 2021, compared to 12 M&A transactions during

the corresponding period in 2020. Most of the deals involve MSSPs seeking to expand regional footprints, grab talent or obtain skill sets in fast-growth areas such as cloud SIEM, cloud SOAR and XDR.

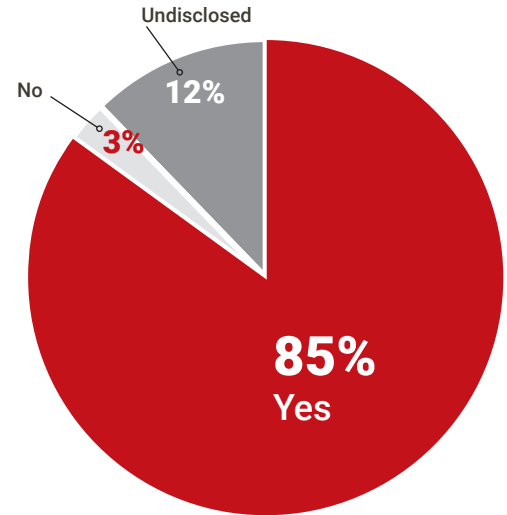

- **Private Equity Investments:** PE firms continue to acquire MSSPs. Active buyers in 2021 so far include Apax Partners and Southfield Capital, among others.
- **MSSP and MDR Convergence:** This multi-year trend, in which MSSPs add managed detection and response (MDR) services, is nearing maturity. Cybersecurity software companies also continue to add MDR services -- occasionally competing with MSSP partners along the way. The key question facing MSSPs: Who within the supply chain delivers the "response" services -- the software companies or the MSSPs? The answer varies from partnership to partnership.
- **SOCaaS Adoption:** MSSPs continue to evaluate and/or adopt SOCaaS (Security Operations Center as a Service) to automate alert management, and to manage security analyst workloads. Also, most MSSPs now offer SOCaaS capabilities to end-customers. Meanwhile, many SOCaaS and MDR solutions from software companies target smaller MSPs, but that market segment remains highly fragmented and in its infancy.

MSSP Alert continues to cover those trends and more on a daily basis.

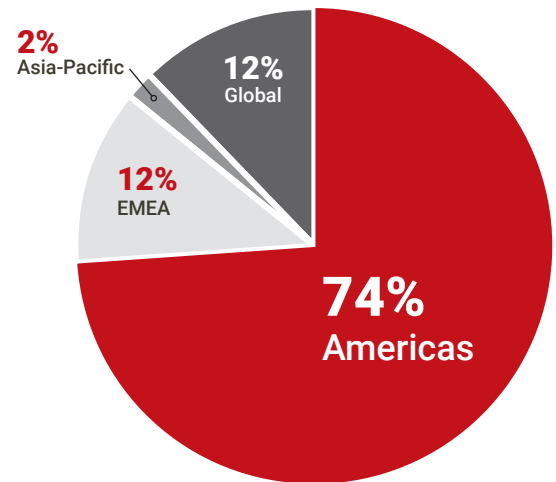

## Managed Security Services Offered

## Is Your MSSP Profitable?

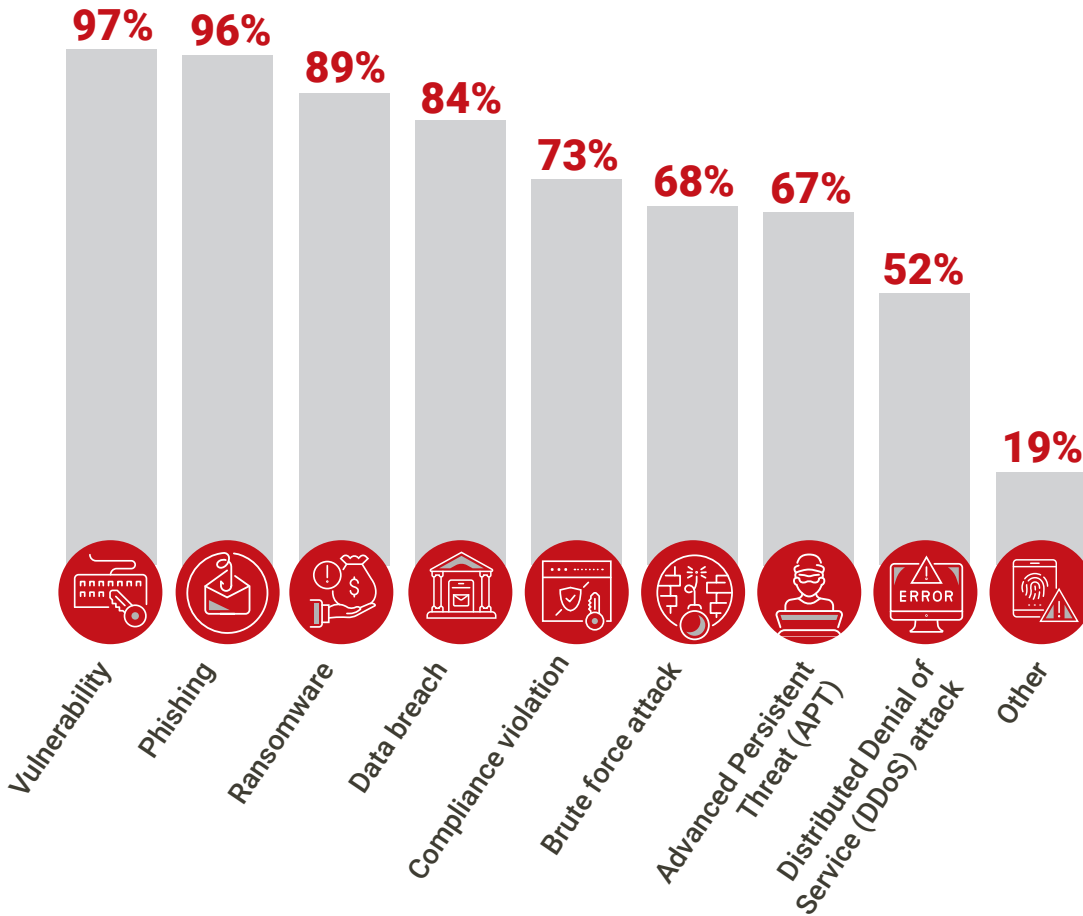

## What Regions Do You Serve?

▲ The Top 250 MSSPs are headquartered in 26 different countries, up from 25 countries in our 2020 report. Most survey participants are headquartered in the United States (75%) followed by Canada (5%), United Kingdom (4%) and India (3%), though MSSP activities for each survey participant frequently extend beyond country borders.

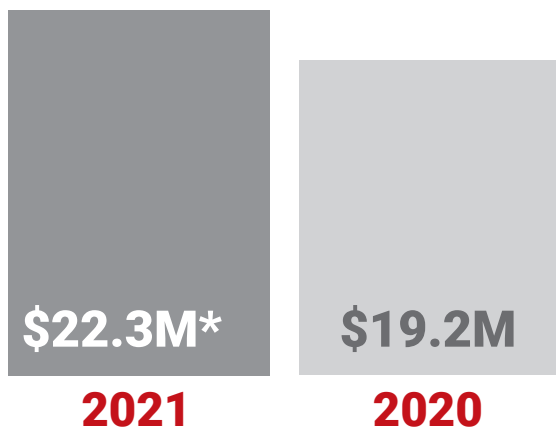

◀ MSSP Alert generally adheres to Gartner's definition of an MSSP, broadly defined to include companies that offer one or more of the managed security services. The bar chart represents the percentage of MSSP Alert survey participants offering each service. Newly added services to this year's survey include cloud security posture management, cybersecurity talent as a service, SOCaaS and XDR.

## What type of security attacks and/or incidents has your MSSP mitigated for customers in 2021?

⚠ The attacks listed weren't necessarily successful attacks. Rather, the data represents the attack vectors that prompt an MSSP response for end-customers.

## Average MSSP Revenue

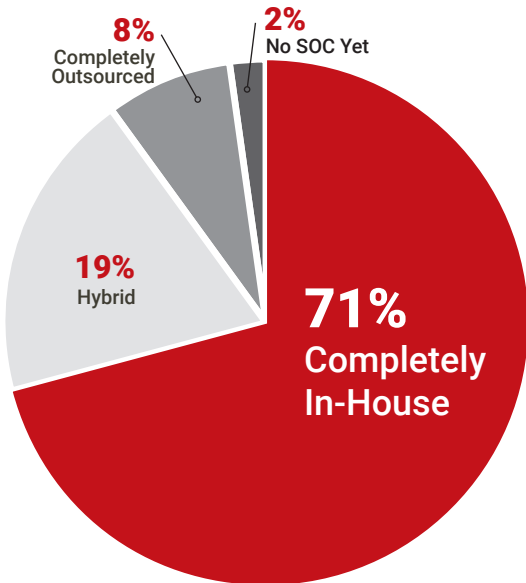

⚠ Most MSSPs participating in our annual survey generate less than \$5 million in annual cybersecurity revenues. However, revenues from the largest MSSPs greatly lift the overall survey results. Survey participants expect to grow managed security revenues about 16 percent in 2021 vs. 2020, which matches the growth rate in our 2020 report.

## Security Operation Centers

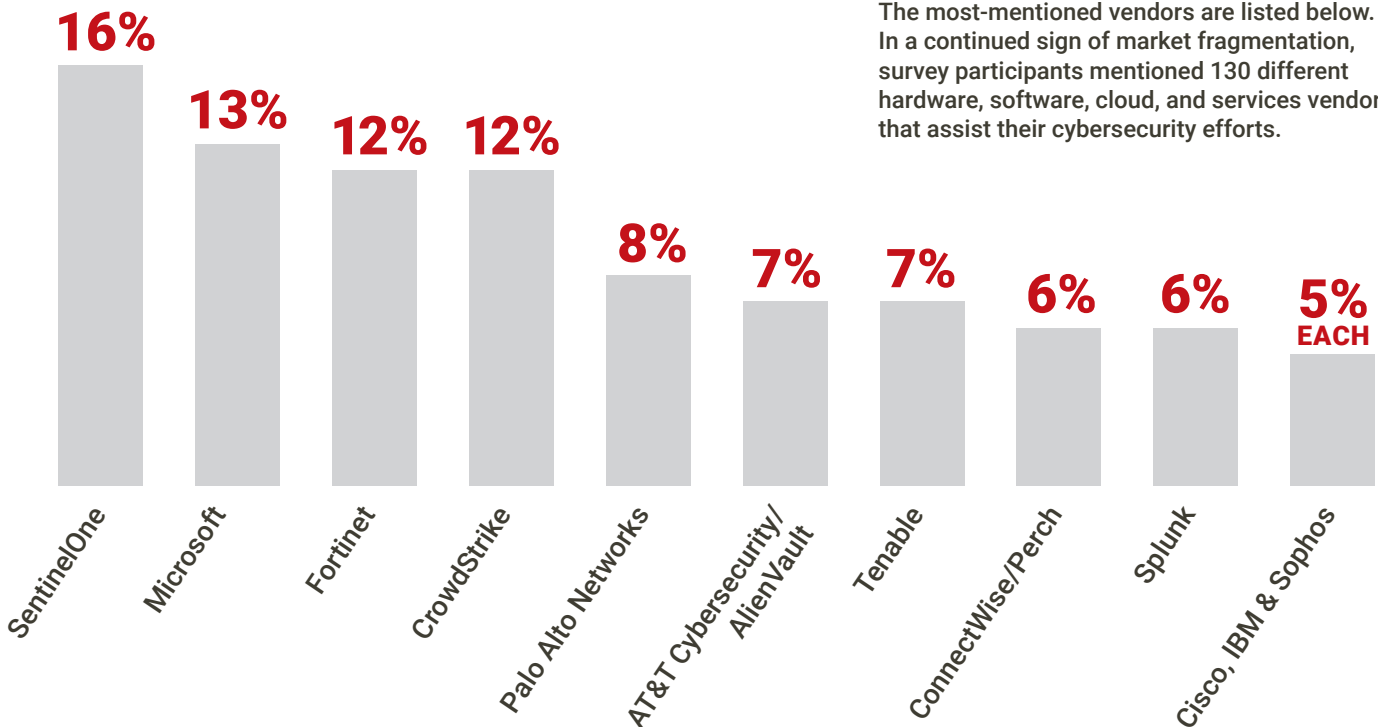

How do you run and manage your security operations center?

◀ The percentage of MSSPs running SOC's completely in-house rose 4 points in 2021 vs. 2020, and MSSPs leveraging hybrid SOC models through partnerships fell 5 points. The data generally reflects the fact that larger MSSPs often have their own SOC's, while small MSPs typically run hybrid or completely outsourced SOC models.

## Top Cybersecurity Vendors Assisting MSSPs

✔ MSSP Alert survey participants were asked to describe which three vendors most greatly assist their managed security services efforts. The most-mentioned vendors are listed below. In a continued sign of market fragmentation, survey participants mentioned 130 different hardware, software, cloud, and services vendors that assist their cybersecurity efforts.
